Basic gripper on device SK50, HSK100 Middle adaptor HSK63, SK40, or other gripper cone

Art.-No.: 990-011C

### Technical data

Power: 10kw  
Size (mm): B400 / D380 / H700  
Weight: 28kg  
Supply: 400V / 50Hz, 20A

### Performance features

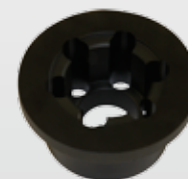

- compact table-top device
- max. chuck length: 300mm
- Ø 3-32 (HM shank)

## Induction shrinking device for the fixing of HM tools

With this redesign, well-proved components were partly taken over from predecessor models and summarized.

With this device, only HM tools can be shrunk in and out.

Only for shrinking HM tools in the size range of Ø3 – Ø32 mm. The screening process is not used with this method. The corresponding parameters for time and performance are set aside in an internal database. This makes an overheating situation virtually impossible for a skilled operator.
